2. Citations and explanations

Claims 1 to 9

Document 1 [JP, 8-136211, A (Yaskawa Electric Corp.), 31 May 1996 (31.05.96), full text, all drawings] represents the general state of the art in the related technical field and describes a technology wherein a secondary pattern and a resolver excitation phase pattern are formed on the disk of a rotor. However, the documents cited in the ISR neither describe nor suggest a technology wherein a rotary transformer secondary coil pattern and a resolver excitation phase pattern are formed on both sides of the disk of a rotor.
